About The Kansas City Free Health Clinic

The Kansas City Free Health Clinic has been providing health care since 1971 and is located in the urban core of Kansas City. Our goal is to provide basic health care services at no charge to uninsured people.

The Clinic is state-of-the-art, modern, immaculate, and our administrators goal is to run a clinic that anyone would want to utilize for their health care needs. It is a very similar to most doctors' offices and offers a wide array of health care services.

Appointments are available in the morning, afternoon, and/or evening. The clinic schedules vary each week depending upon the availability of clinical staff and we have Saturday morning clinics generally about once a month.

Our patients receive free, first class health care from two full time staff physicians and over 40 volunteer physicians as well as a wide array of other staff members, from nurses to social workers.

Just a few of our stats for 2004-2005

- 500 volunteers donated 36,000+ hours of service valued at \$2.3 million
- 40,000 patient encounters
- 20,500 medications were dispensed to patients

The Kansas City Free Health Clinic's mission is to promote health and wellness by providing quality services, at no charge, to people without access to basic care.

This mission is accomplished by strong and unwavering core values primarily by:

- Respecting the dignity of each individual
- Serving a diverse community
- Providing outreach services within the community
- Working collaboratively with volunteers

- Fostering individual and community partnerships
- Responding to the changing health and wellness needs of the community
- Maximizing financial resources

Our patients, who come to the Clinic for their basic health care needs, are uninsured or underinsured. Though most work the following situations are common:

- They are employed in industries that do not offer benefits for example, restaurant staff, hairdressers, child care workers, etc. or they work part time and are not offered benefits
- Their benefits have been cut or they have had their premium increase so much they can no longer afford it
- Some are small businesses owners and cannot afford health insurance
- Others have recently become unemployed and no longer have benefits or can pay their COBRA premium

Why we need your help

The KC Free Health Clinic is one of the largest free health clinics in the country, we are funded exclusively through contributions, grants, special events, United Way, and contributed goods and services.

With the funding and clinical staff we currently have, the Clinic is presently at capacity. We see every patient we can and currently offer all the services we can.

Currently there are over 300,000 uninsured people live in the Kansas City area and recent cuts in Missouri Medicaid are increasing this number!

As the ranks of the uninsured increase, so do the service challenges and financial needs of the Clinic. We can use your help! We need volunteers, donations, and contributions.
